Building Financial Futures

Trends and insights of those saving for retirement across America.
Executive Notes

While the majority of people are juggling multiple financial priorities, Fidelity analysis shows that more and more have prioritized saving for retirement. From increased participation in Defined Contribution (DC) plans to double digit growth in the percent contributing to an Individual Retirement Account (IRA), it’s clear more people than ever are focused on creating a secure financial future.
Defined Contribution Plan trends
DC plan participation continues to climb

Auto enrollment (AE) proves to be a changing force as DC plan participation continues to increase.

ADDITIONAL INSIGHTS¹:

• 90% of employees who are auto enrolled don’t opt out.

• Participation among millennials has increased by 55% over the last 10 years in part due to employers adopting auto-enrollment.
Contributions on the rise

Employees and employers are both contributing more to help increase retirement readiness.

ADDITIONAL INSIGHTS$^2$:

- Of those employers offering auto-enrollment, a record 47% are now auto enrolling at 4% or higher, up from 29% five years earlier.

- Average employee contributions have increased $1,080 in the last five years, while average employer contributions have hit an all time high, increasing $500.
DC plan balances

With the recent market activity, balances have increased by 17% in the last 12 months.

ADDITIONAL INSIGHTS²:

• Auto-enrolled employees who have been invested in their DC plan for 10 years, now have an average balance of $128,100.

• Average balances for female participants have increased 84% in the last 10 years, reaching $88,300 in Q4 2019.
Over a decade, savers hit record highs

Dollars invested early and consistently in one’s career can hold the most growing power which is why we believe people should start saving for retirement as early as possible.

Average balance for employees continuously invested in a DC plan for 10 years by generation²*

- **BOOMER**: $389,800
- **GEN X**: $304,300
- **MILLENNIAL**: $149,800

Average balance for employees continuously invested in a DC plan for 15 years by generation²*

- **BOOMER**: $462,100
- **GEN X**: $384,500
- **MILLENNIAL**: $198,200

* Data as of 12/31/2019
Investment diversification improves over time

With 98% of employers offering target date funds and 91% using them as the default investment option², employee diversification has improved greatly over the last 10 years.

**ADDITIONAL INSIGHTS²:**

- Baby Boomers are the most likely generation to be too aggressively invested – potentially putting them at risk so close to retirement.
- 69% of millennials are 100% invested in a target date fund, due in part to being auto-enrolled in their 401(k) and defaulted into the option.
Trends in workplace managed accounts

The percent of plans offering a workplace managed account has continues to rise.

ADDITIONAL INSIGHTS:

• While plan sponsor adoption of managed accounts has grown, participant adoption is still relatively low.
• 46% of larger plans (with over 1,000 participants) have adopted a workplace managed account.
Trends in DC Investment Lineups

The largest corporate DC plan sponsors now offer around 16 investment options in their lineup².

Large Employer - average number of investment options offered²

As of Q4 in the year noted
DC loans trending down

Employers continue to focus on decreasing leakage from retirement plans. While loan usage is trending down, many have turned to financial wellness programs as a way to improve employee financial behaviors.

**ADDITIONAL INSIGHTS:**

- Women investors continue to keep new loans initiated low at 9.4%, down 19% in the last five years¹.
- 24% of participants who take a loan lower their deferral or stop saving altogether in effort to offset the loan repayment⁴.
- Only 9.4% of the population initiated a new loan in the last 12 months².

![Most common reasons for taking a loan³](chart)

- Pay down/pay off high-interest credit card debt: 31%
- Home improvement or repairs: 24%
- Buy a home or refinance a mortgage: 21%
- Pay outstanding bills: 19%
Withdrawals

While the goal is to save and invest for the long-term, things like credit card debt, student loans and the cost of housing can make it tempting to withdraw savings, diminishing the power of compound interest over time.

ADDITIONAL INSIGHTS:

- Cash out rates among younger employees remain high, with 42% under age 30 taking a full distribution when changing jobs².
- The most common reason for taking a hardship withdrawal is to prevent eviction/foreclosure. While only 5% of savers take a hardship annually² we’re starting to see this trend increase since the 2018 Bipartisan Budget Act.
**Roth 401(k)**

In just the last five years, the percent of plans offering Roth in 401(k)’s has increased by 42%, and with this option being increasingly popular with younger participants, contributions are also on the rise.

**ADDITIONAL INSIGHTS**:

- Millennials are the most likely generation to be contributing to Roth, increasing from 9% to 12% in the last 10 years.
- 22% of plans offer employees the ability to convert pre-tax assets to Roth, twice the number who offered this option in 2015.
Tax-exempt workers making strides

Tax-exempt companies, such as religious, healthcare, higher education and governmental organizations are increasing retirement savings through engagement and education.

ADDITIONAL INSIGHTS:

- 46% of all assets in tax-exempt plans are invested in target date funds.
IRA Trends
IRA balances

7.8 million people are saving and investing for retirement through 9.9 million IRA accounts where the number of accounts has grown by 7% and average balances have increased 17% between Q4 2018 and Q4 2019.

ADDITIONAL INSIGHTS:

- Female millennials owned IRA accounts increased by 22% between Q4 2018 and Q4 2019.
IRA contributions

While not all account holders contribute to their IRA on an annual basis, the number who do has increased by 7.6% between YTD Q4 2018 and YTD Q4 2019.

ADDITIONAL INSIGHTS:

- Across the generations, Roth IRAs are the savings vehicle of choice with 55% of all IRA contributions going to Roth in YTD Q4 2019.
- Contributing millennial Roth IRA accounts increased 15.7% between 2018 and 2019.

Contributions

Contributing to more than one retirement plan takes budgeting and dedication. Contribution rates have recovered following the financial crisis of 2008/2009 and have remained steady the last several years.

Average IRA contributions amounts for “DC/IRA” savers:

- 2008: $4,000
- 2010: $4,400
- 2012: $4,200
- 2014: $4,400
- 2016: $4,200
- 2018: $4,200
- 2019: $4,300
5 tips to improve retirement readiness

1. **Know if you’re on track:** Fidelity developed a set of saving milestones to help workers know if they are on track with their retirement savings goals. Read this Viewpoints article.

2. **Build an emergency fund:** Having 3-6 months salary stashed away in case of an emergency can help people avoid taking loans and withdrawals from their retirement nest egg.

3. **Create an investment strategy:** Determine if you can take charge of investing your savings on your own. If you can’t or prefer not to, leverage a Target Date Fund or Managed Account.

4. **Think about Health Care:** If available, consider enrolling in a Health Savings Account, which can help you save for current and future medical expenses.

5. **Don’t cash out:** When changing jobs, resist any urge to cash-out or take distributions as they diminish the power of long-term saving.
**FOOTNOTES**

*Baby Boomers are those people born between 1946 and 1964.*  
*Gen X are those people born between 1964 and 1980.*  
*Millennials are those people born between 1981 and 1997.*

Investing involves risk, including risk of loss.

**For “Asset Allocation” purposes, the participant’s current age and equity holdings are compared with an example table containing age based equity holding percentages based on an equity glide path. The Fidelity Equity Glide Path is an example we use for this measure and is a range of equity allocations that may be generally appropriate for many investors saving for retirement and planning to retire around ages 65 to 67. It is designed to become more conservative as participants approach retirement and beyond. The glide path begins with 90% equity holdings within a retirement portfolio at age 25 continuing down to 24% equity holdings at age 93. Equities are defined as domestic equity, international equity, company stock, and the equity portion of blended investment options. The Fidelity equity band is not intended as a benchmark for individual investors; rather, it represents a range of equity allocations that may be appropriate for many investors saving for retirement. Investors should allocate assets based on individual risk tolerance, investment time horizon, and personal financial situation. A particular asset allocation may be achieved by using different allocations in different accounts or by using the same one across multiple accounts**
